# ELEX™

## CONVECTIVE PANEL HEATERS

ELEX ET1 Convective panel heater with electronic thermostat and 24 hour digital countdown timer

ELEX ET7 Convective panel heater with electronic thermostat and 7 day multi-programmable digital timer

### It's beautifully cost effective too!

#### ELEX convective panel heaters

ELEX slimline convective panel heaters are designed to blend elegantly into any interior. There are 4 model sizes available with either 24 hour or 7 day electronic programmable timer options to suit your individual room requirements.

#### Natural, efficient, healthy heat

The combination of natural convective currents and radiant heat quickly warms you and the space around you. The ELEX range is ideal for sufferers of asthma, allergies and hay fever. There are no fans, ensuring the circulation of dust, pollens and germs is minimal, so you and your family can breathe easy.

#### Cost effective heating

The unique X-shaped heating element used within the ELEX range is engineered with maximum surface area to provide efficient heat exchange with minimal operating cost. Save even more money and energy with the economy mode setting, 24hr digital countdown timer or optional 7 day multi-programmable digital timer.

#### Assured peace of mind

The ELEX convective panel heater range complies with Australian and New Zealand electrical standards. The inbuilt auto reset thermal cut-out and child safety lock function ensures that ELEX heaters have a superior safety advantage. Your family is further protected as the exclusive X-shaped heating element is

electrically protected so even metal objects touching the element will not cause electric shock. With solid metal casing, and no moving parts, you will enjoy trouble and maintenance free operation.

#### Guarantee

Your ELEX also comes with a 5 year no-fuss replacement guarantee.

#### ET1 Series

The ELEX ET1 series is supplied with wall mounting brackets and a castor wheel set, enabling a choice for optional portability. User friendly operation is assured with touch pad controls and a large display screen. Control settings include an electronic thermostat with 0.5°C increments and memory function; a 24 hour digital timer, economy mode, and child safety lock function.

#### ET7 Series

In addition to the above mentioned features, the ELEX ET7 series includes a daylight savings function and 7 day multi-programmable digital timer with manual override. This timer option gives you automatic control with up to 16 preset day combinations and eight ON/OFF times per day. This option can reduce your operating costs even more and ensure your ELEX is ON when you need it, and OFF when you don't.

MODEL	SERIES	**WATTS	DIMENSIONS(mm)	EFFECTIVE HEATING AREA		*APPROX RUNNING COST
				LIVING AREA	BEDROOM	
ELEX 1000	ET1 / ET7	1000	540 X 400 X 80	11 sq m	13 sq m	8.4¢/hr
ELEX 1500	ET1 / ET7	1500	640 X 400 X 80	16 sq m	20 sq m	12.6¢/hr
ELEX 2000	ET1 / ET7	2000	940 X 400 X 80	20 sq m	25 sq m	16.8¢/hr
