operating
costs – less
than 1¢ / hour**

**Produces no
interference
with
computers**

**Easy surface
mounting**

**Maintenance
free**

Prevent damage caused by dampness and humidity

A solution for humidity

If you've ever experienced the frustration of photocopiers jamming, damp clothes, ruined collectables, mildewed shoes, smelly cupboards, soggy archives or any other product of damp or humid conditions.... you need a DRYZONE.

DRYZONE is the mini heater that prevents costly damage and inconvenience caused by dampness and humidity. The DRYZONE Dehumidifying Radiant Heater is designed so it produces a gentle, even radiant heat at a low temperature to keep any storage space safe, dry and free from dampness and humidity.

Safe and silent operation

The unique element used in the DRYZONE heaters enable the heat to be spread evenly over the entire heater surface, enabling efficient heat output at a very low temperature. DRYZONE heaters are manufactured with a tough metal casing that completely protects the heater from harm. There are no hot spots to cause overheating and an internal safety cut out thermostat ensures peace of mind. There are no moving parts within the heater, ensuring silent, maintenance free operation.

Low operating costs

The DRYZONE heater uses just 50 watts of power, costing you less than the average light bulb to operate. You would invest less than 1 cent an hour to keep your expensive items safe and dry.

Savings to you

If you are using the DRYZONE Dehumidifying Radiant Heater to keep your photocopy paper dry, the heater will pay for itself if it eliminates just one service call out. You can prevent service costs, smells, mildew, wastage and embarrassment.

Easy surface mounting

Pivotal surface mount tabs enable the DRYZONE heater to be screwed to any surface.

Your 2 year guarantee

The DRYZONE Dehumidifying Radiant Heater comes with a 2-year no fuss, repair or replacement guarantee.

Suitable de-humidifying applications

- Photocopy paper storage
- Wardrobes
- Archive storage
- Paper storage
- Stamps
- Switchboards
- Lockers

Safe radiant heat for animal enclosures

The DRYZONE 50 watt radiant heater has an IP44 protection rating that makes it suitable for use in undercover outdoor applications such as reptile or rodent enclosures, kennels, catteries and more.
