CONVECTIVE PANEL HEATERS

It's beautifully cost effective too!

ELEX convective panel heaters

The ELEX slimline profile is designed to blend elegantly into any interior with a choice of dove white or stainless steel finish.

Natural, efficient, healthy heat

The combination of natural convective currents and radiant heat quickly warms you and the space around you, and is ideal for sufferers of asthma, allergies and hay fever. There are no fans, ensuring the circulation of dust, pollens and germs is minimal, so you and your family can breathe easy.

Cost effective heating

The unique X-shaped heating element used within the ELEX range is engineered with maximum surface area to provide efficient heat exchange with minimal operating cost. There are 5 models available, ranging from 750 to 2400 watts to suit your exact needs. Save even more money and energy with the 7 day multi-programmable electronic timer or push button timer options.

Assured peace of mind

The ELEX convective panel heater range complies with both Australian and New Zealand electrical standards. The inbuilt auto reset thermal cut-out ensures that ELEX heaters have a superior safety

advantage. Your family is further protected as the exclusive X-shaped heating element is electrically protected so even metal objects touching the element will not cause electric shock. With solid metal casing, and no moving parts, you will enjoy trouble and maintenance free operation. Your ELEX also comes with a 5-year no fuss guarantee.

Available options

7 day multi-programmable electronic timer

This electronic digital timer option gives you automatic control with up to 14 preset day combinations and eight ON/OFF times per day. This option can reduce your operating costs even more and ensure your ELEX is ON when you need it, and OFF when you don't.

Push button timer

This timer option automatically turns your ELEX off after a preset period of one or two hours. Ideal for student accommodation, motels etc.

Stainless steel finish

Stylish and modern, the stainless steel finish adds even more elegance to any environment.

Optional Portability

The ELEX includes wall mounted brackets as standard. A choice of freestanding feet, or castor wheels creates a convenient portable option.

M O D E L S	A N D	D I M E N S I O N S (mm)	E F F E C T I V E H E A T I N G A R E A	* A P P R O X R U N N I N G C O S T
