

# Airconditioners give year-round comfort

**A** NEW range of affordable airconditioners combines energy conservation with sleek design. The Elexa models, by Thermofilm Australia, are a series of constant-speed airconditioners with high energy ratings.

The lifestyle benefits offered by the heating and cooling technology means comfort is offered year round at affordable prices.

Featuring a 5.5 and 5-star energy rating respectively, the Elexa-09M and Elexa 12M models have been named top energy-saving award winners (TESAW) by the Australian Government energy-rating website.

The airconditioners have many quality features, from the easy-to-use remote control to the anti-rust outdoor cabinets that are suited for coastal areas.

Air quality is enhanced with the electrostatic fibre filter which attracts carbon and dust, making rooms pleasant and ideal for allergy sufferers.

These high-wall, split-system airconditioners would suit the decor of any home.

They are easy to use and maintain, with a front panel that can be quickly removed and cleaned with a minimum of

fuss, ensuring the unit operates at its best.

The Elexa range has been designed to work hard, reduce noise and built to last.

Thermofilm Australia has backed the quality of Elexa with a five-year residential warranty.

There are six model sizes, from 2.60kW to 9kW, with the largest size being suitable for small commercial applications.

Other features include hydrophillic aluminium fan, low noise airflow system, valve protection cover and flexible wiring connection.
